Re: Blocks 14 & 18 Soil Sampling Notification

Dear Parents,

We previously updated you of plans at the Mission Bay Campus for underground utility infrastructure, roads, parking and shuttle lot pavements, and the relocation and expansion of the child care center at Mission Bay. In preparation for this project, on Tuesday, February 28 and Wednesday, March 1, 6:30 am - 4pm, soil sampling involving a track-mounted hydraulic drill rig will occur on Blocks 14 & 18. Noise generating work created by a hydraulic hammer is expected to be brief and intermittent but will be suspended daily during children's naptime.

The scope of work includes soil sampling at two locations in the child care center parking lot. This will occur very early in the morning prior to peak child care drop off periods. Whether you arrive at the center by vehicle or on foot, please observe signs and flagmen.

Development at Mission Bay is subject to, among other regulations, the Mission Bay Risk Management Plan (RMP). The oversight agency for the RMP is the Regional Water Quality Control Board (RWQCB). The RMP was approved by the California Environmental Protection Agency with input from the San Francisco Department of Public Health. The RMP and a FAQ document pertaining to the RMP along with associated reports, documents and an archive of project updates are readily accessible on the UCSF Child Care web site at http://campuslifeservices.ucsf.edu/childcare/35/mission_bay_construction_information
